NOTE. Commencing with the November 1979 issue the publications *Civilian Employees, Australia (Preliminary)* (6212.0) and *Civilian Employees, Australia* (6213.0) have been combined into a single publication *Civilian Employees, Australia* (6213.0).

MAIN FEATURES

The figures below refer only to civilian wage and salary earners excluding those in agriculture and private domestic service.

Employment increased by 12,900 persons in November 1979 (+5,200 males, +7,600 females). In seasonally adjusted terms this was a decrease of 700 persons (-1,100 males, +400 females).

Private employment increased by 11,800 persons (-1,900 seasonally adjusted) and government employment increased by 1,000 persons (+1,200 seasonally adjusted).

The principal variations were in wholesale and retail trade (+11,600), transport and storage (+2,400), finance, insurance, real estate and business services (+1,000), manufacturing (-1,900) and community services (-500).

EXPLANATORY NOTES

Introduction

The figures generally relate only to civilian wage and salary earners, not the total labour force. They therefore exclude employers, self-employed persons, unpaid helpers and the unemployed. Also excluded, because of the inadequacy of current data, are wage and salary earners in agriculture and private households employing staff. Defence forces are included in Table 2.

2. The estimates in this publication, except those relating to government employees and defence forces, are based on comprehensive data (referred to herein as 'benchmarks') derived for the purpose from population censuses and other sources.

3. The data needed to derive the estimates for periods subsequent to benchmark dates are obtained from three main sources, namely, (a) current payroll tax returns; (b) current returns from government bodies; and (c) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private

employment, is estimated. For the latest month recorded employment obtained from the foregoing sources accounts for about 85 per cent of the employees in the industries covered. Month-to-month changes shown by current data are linked to the benchmark data to derive the monthly estimates.

4. Although the series generally measure the short-term trends in employment in the defined field reasonably well, they may be less reliable for longer-term measurement. There are conceptual differences between benchmark and current data, and changes in such factors as labour turnover, multiple jobholding and part-time working all affect the trend over longer periods. Also, increases in payroll tax exemption levels may result in a reduction in the number of businesses liable for payroll tax and, as a consequence, increase the size of the unrecorded sector for which employment has to be estimated. Such a reduction is more significant in those industries, such as retail trade, in which there is a high proportion of businesses with few employees. With an increase in exemption levels a greater degree of estimation may be required in producing employment estimates for those industries.

5. For these reasons it may become necessary to amend the series from time to time. A decision to do so will depend upon an analysis of the estimates, trends in labour turnover, multiple jobholding and part-time work, and comparisons of the estimates with data available from other sources such as population censuses, labour force surveys and economic censuses and surveys.

Concepts and definitions

6. The concepts and definitions applicable to these estimates are those adopted at the 1976 population census, which conformed closely to the recommendations of the Eighth International Conference of Labour Statisticians (Geneva, 1954). At the census the following question was asked in respect of all persons fifteen years of age and over:

"Did the person do any work at all last week?"

For those who did not work or did only unpaid work, a further question was asked:

"Did the person have a full-time or part-time job, business, profession or farm of any kind last week?"

7. Provided they had not been temporarily laid off by their employer without pay for the whole of the week, persons who had worked for wages, salary, payment or profit or who had had a job, business, etc. (even though on holidays, sick, on strike, etc.) were classified as employed. Persons in this category were classified as wage or salary earners if on their census schedule they were stated to be 'a wage or salary earner' in the job they held in the previous week.

Current data

8. Current data supplied by reporting enterprises or establishments generally refer to persons on the payroll for the last pay-period in each month. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' payrolls because they are on leave without pay, on strike or stood down for the entire period are excluded.

9. In all States and Territories most employers paying wages in excess of a designated exemption level are required to lodge payroll tax returns. Certain Australian Government bodies, religious and benevolent institutions, public hospitals and other similar organisations are specifically exempted under the various Payroll Tax Acts. The following table shows details of exemption levels (in dollars per week):

Government employment

10. Government employees comprise not only administrative employees but also all other employees of government bodies. (Australian, State, local and semi-government) on services such as railways, road transport, banks, postal and telecommunications, air transport, education (including universities, colleges of advanced education, etc.), radio, television, police, public works, factories, marketing authorities, public hospitals (other than those run by charitable or religious organisations) and departmental hospitals and institutions.

Industry

11. The industry classification used in this publication is the *Australian Standard Industrial Classification (ASIC)*, described in *Australian Standard Industrial Classification (Preliminary Edition)*, 1969, Volume 1 (1201.0).

Revised estimates

12. The civilian employees series has undergone an extensive revision. The figures contained in this issue are based on revised benchmarks and other data and are not compatible with figures contained in issues of *Civilian Employees* (6212.0 and 6213.0) before July 1979. The revisions were made on the basis of data from the 1971 and 1976 population censuses, labour force surveys, economic censuses and surveys, payroll tax returns, returns from government bodies and other employment returns. More detailed estimates and an explanation of the methods used to revise them were published in the July 1979 issue of *Civilian Employees, Australia* (6213.0). The complete series of revised estimates for the period June 1971 to June 1979, plus a corresponding series of main aggregates for the period June 1966 to May 1971, based on revised 1966 and 1971 benchmarks, will be issued in a long-term publication entitled *Civilian Employees, Australia, June 1966 to June 1979* (6214.0), which is expected to be available in March 1980.
